**Important:**

Make sure that all materials are intact and have not worn too thin or have holes in them.

Check the item’s label or tag to confirm the type of material.

¹ Material dimensions are the right size for an average adult.
Steps

1. Cut out the outer layer, middle layer and inner layer pieces (see above for dimensions and material to use).

   Place the outer layer on the bottom, the middle layer in the middle, and the inner layer on top.

2. With the inner layer facing up, fold over 1 cm of the three pieces of material for the top and bottom edges and stitch at the borders (see red dotted lines).

3. With the inner layer facing up, fold over 1.5 cm of material for the side edges and stitch (see red dotted lines).

4. Thread a 20 cm piece of elastic, string or cloth strip through the wider edge on each side.

   Use a safety pin or large needle to thread it through.
5. Knot the ends tightly or stitch them together.

6. Put on the mask with the outer layer facing away from your face. Adjust the mask to make sure it fits tightly over your nose and mouth. While wearing and removing the mask, do not touch the outer layer. Wash your hands before putting your mask on and after taking it off.

7. If you want to improve the fit of your mask you can add a nylon stocking over the mask and tie at the back of the head.
